

BRYLE JAMES U. GABUNADA

Backend Developer | AI Integration Engineer

Cebu City, PH | +63 946 252 9143 | gabunadame@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Backend developer and AI integration engineer with 2+ years of production experience building PHP/CakePHP/MySQL systems, REST APIs, and LLM-powered support workflows. Hands-on with OpenAI, Anthropic, Dify, RAG document ingestion, custom MCP HTTP services, Slack automation, and Server-Sent Events for real-time conversational AI responses. Strong in MySQL optimization, automation, QA practices, and cross-functional delivery for web, mobile WebView, and cloud-based SaaS products.

TECHNICAL SKILLS

Conversational AI: OpenAI API, Anthropic API, Dify, RAG workflows, MCP services, multi-turn Slack threads, AI-assisted support automation

Backend & APIs: PHP, CakePHP, Laravel, RESTful APIs, MVC architecture, webhooks, Cron jobs, Server-Sent Events, Linux/bash, Docker

Frontend/UI: JavaScript, jQuery, Vue.js, HTML/CSS, responsive web UI support, mobile WebView integrations, support/admin tooling

Data & Quality: MySQL schema design and query optimization, Codeception, Playwright (Python), Postman, Git/GitHub, JIRA, technical documentation

PROFESSIONAL EXPERIENCE

Forty Degrees Celsius Inc. | Backend PHP Developer & AI Integration Engineer

Sep 2023 - Present

- Design and maintain production PHP/CakePHP/MySQL backend systems and RESTful APIs for high-availability web platforms and AI-enabled support workflows serving thousands of daily users.
- Integrated OpenAI, Anthropic, Dify, RAG document ingestion, and a custom MCP HTTP service into NativeCamp AI Support, enabling context-aware customer and teacher support and reducing manual response handling by ~60%.
- Built Slack-ChatGPT/Claude middleware that routes @mentions to LLM providers, preserves threaded conversation context, and streams real-time responses via Server-Sent Events; handles hundreds of interactions daily.
- Implemented webhook, Cron, and n8n automation pipelines for operational support workflows, removing hours of recurring manual work while improving consistency of AI-assisted processes.
- Shipped production-quality releases with Codeception unit tests, Playwright (Python) coverage for critical flows, structured error investigation, Git workflows, and JIRA-based sprint collaboration.
- Supported web and mobile UI improvements using JavaScript, jQuery, Vue.js, HTML/CSS, including iOS/Android WebView audio behavior and Lighthouse/SEO performance tuning.

LiteCloud / Cerpsys (Litecloud Corporation) | QA Engineer & Technical Documentation Specialist

2022 - 2023

- Performed functional and regression testing across cloud-based HR, accounting, ERP, POS, and inventory SaaS modules; authored test cases, bug reports, and user-facing guides.
- Joined client discovery sessions to clarify requirements, explain system updates, and translate operational needs into actionable documentation for product and engineering teams.

SELECTED AI AND ENGINEERING PROJECTS

NativeCamp AI Support: CakePHP MVC, Dify LLM workflows, RAG document ingestion, custom MCP HTTP service, and Playwright test automation for 24/7 AI-assisted support coverage.

Slack-ChatGPT/Claude AI Middleware: PHP middleware for Slack @mentions, OpenAI/Anthropic integrations, threaded multi-turn context, and real-time SSE response streaming.

Automated Test Reporting and API Migration: Daily Codeception coverage metrics posted to Slack via webhook; migrated auth/registration flows to Laravel with token-based APIs and test coverage.

Mobile WebView and Performance Improvements: URL scheme-based audio playback for iOS/Android WebViews plus media loading and metadata optimization for Lighthouse and SEO gains.

EDUCATION

Cebu Technological University - Main | B.S. Computer Engineering, Academic Distinction Awardee | 2019 - 2023

Cebu Institute of Technology - University (CIT-U) | Senior High School, STEM Strand, With Honors | 2017 - 2019
